## EMPLACEMENTS SCENARIO

**Components:** 4 Objective Tokens,  
4 matching Objective Cards

**Setup:** After placing obstacles, starting with the second player, each player places 2 objective tokens representing defensive batteries. Defensive batteries must be placed within range 3 of the controlling player's board edge and beyond range 2 of another defensive battery.

**Combat:** Defensive batteries cannot modify their attack dice. While defending, defensive batteries are always considered to be reinforced.

**Scoring:** After calculating scores, each player gains 30 points for each enemy defensive battery they destroyed.

**Defensive Batteries:** Each objective token is considered as a *Remote* that can be targeted by attacks. Defensive batteries attack at initiative 0 and can fire at any ship at range 2-3. Defensive batteries have a hull value of 5, an agility of 0 and a primary weapon value of 3. When attacking, range bonuses are not applied.

## BLACK BOX SCENARIO

**Components:** 4 Objective Tokens

**Setup:** After obstacles are placed, each player places 2 objective tokens within range 2 of their player board edge and beyond range 3 of another objective token.

**End Phase:** During the End Phase, ships at range 1 of an opponent's objective token may remove that objective token unless there is an enemy ship at range 1 of that token.

**Scoring:** After calculating scores, each player gains 30 points for each opponent's objective token removed.

## VIP SCENARIO

**Components:** 3 Pairs of Objective Tokens,  
3 Pairs of matching Objective Cards

**Setup:** 3 Pairs of Objective Tokens and Objective Cards.

After placing forces, each player assigns each of their 3 objective cards (  ,  ,  ) face-down to one or more of their ships. Assign the associated objective tokens face-down to those ships as a reminder.

The Lightsaber (  ) token must be assigned, its carrier may not be placed in reserves.

After a ship with an objective token is damaged, reveal its objective card. If the  objective card is revealed, place 2 evade tokens on it. While the ship with the  objective card attacks or defends, it may remove up to two evade tokens from that card to gain that many matching tokens.

**Scoring:** If the ship equipped with the  objective card is destroyed, the opposing player gains 50 points.

## ASTEROID FIELD ENVIRONMENT

**Obstacles:** 10 Asteroids

**Setup:** Obstacles may be placed within range 1 of each other and at range 2 of the neutral board edges.

## CONJOINED ENVIRONMENT

**Obstacles:** 8 Obstacles

**Setup:** After a player places an obstacle, they must place a second obstacle touching that obstacle.

## NEBULA ENVIRONMENT

**Obstacles:** 5 Gas Clouds, 3 Non-Asteroid Obstacles

**Setup:** After the second obstacle is placed, any additional obstacles must be placed within range 1-2 of another obstacle and beyond range 3 of the player board edges.

Obstacles may be placed at range 2 of the neutral board edges.

## OLD WRECKAGE ENVIRONMENT

**Obstacles:** 3 Asteroids, 5 Debris Clouds

**Setup:** Asteroids must be placed first.

All asteroids after the first one must be placed within range 1-2 of other Asteroids.

Debris Clouds must be placed touching an Asteroid and may be placed at range 1 of other Debris Clouds. They may be placed at range 2 of the neutral board edges.

## PLANETARY RING ENVIRONMENT

**Obstacles:** 8 Obstacles

**Setup:** Obstacles must be placed beyond range 3 of the player board edges and range 0 of the neutral board edges.
