

## Resources and iconography

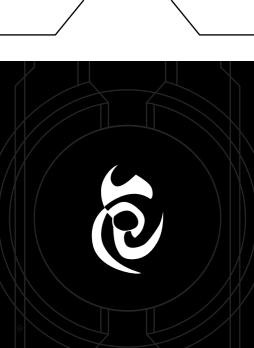

### OUTPOST WILD CARD

Objectives: 2 Outpost Tokens

Setup: After placing obstacles, each player places 1 outpost token ( ) at range 0 of an obstacle.

Obstacles may have 1 or fewer at range 0.

**Combat:** While a ship defends within range 1 of an obstacle with a outpost token, that ship may convert

a 👁 to an 🖣 result.

# ASTEROID FIELD

Objectives: 10 Asteroids

**Setup:** Obstacles may be placed within range 1 of each other and at range 2 of the neutral board edges.

# TRITIANIAM DEPOSITS WILD CARD

The range of detonating bombs is increased by 1.

## EMERGENCY REINFORCEMENTS WILD CARD

**Setup:** Before placing forces, each player chooses 1 small or medium ship and places it in reserve.

After a friendly ship was dealt a damage card, you may place a ship from your reserve within range 1 of any board edge and beyond range 3 of any enemy ship.

# FRACTURED SENSORS WILD CARD

When a ship locks, it cannot acquire locks on ships obstructed by obstacles.

When a ship moves through or overlaps a gas cloud, it must break all of its locks and all locks on it.

# UNSTABLE FUEL WILD CARD

After a ship is destroyed, every ship at range 0-1 rolls 1 attack die. On a  $\divideontimes$  result, the ship suffers one  $\divideontimes$  damage.

## PROBING PROBLEM

SCENARIO

Objectives: 4 Objective Tokens,

a shield value of 1

4 matching Objective Cards

**Setup:** Each player places 2 objective tokens representing probes within range 2 of their player board edge and beyond range 3 of another probe.

System Phase: Each probe recovers 1 shield.

Probes relocate using speed 1 or 2 bank (1, 7) or straight (1) templates.

Combat: At initiative 0, probes may choose a ship within range 0-1. That ship gains a strain token and rolls 1 attack die. On a ★ result, it gains 1 stress token.

**Probes:** Each objective token is considered as a remote that can be targeted by primary weapon attacks after round 3. When a player destroys a probe, that player gains 30 points.

Probes have a hull value of 4, an agility value of 2 and

**2 0 4 0 1** 

## **EMPLACEMENTS**

SCENARIO

Objectives: 4 Objective Tokens,

4 matching Objective Cards

**Setup:** After placing obstacles, starting with the second player, each player places 2 objective tokens representing defensive batteries. Defensive batteries must be placed within range 3 of the controlling player's board edge and beyond range 2 of another defensive battery.

Combat: Defensive batteries cannot modify their attack dice. While defending, defensive batteries are always considered to be reinforced.

**Scoring:** After calculating scores, each player gains 30 points for each defensive battery they destroyed.

**Defensive Batteries:** Each objective token is considered as a remote that can be targeted by attacks. Defensive batteries attack at initiative 0 and can fire at any ship within range 2-3.

Defensive batteries have a hull value of 5, an agility of 0 and a primary weapon value of 3. When attacking, range bonuses are not applied.

## BLACK BOX

Objectives: 4 Objective Tokens

**Setup:** After obstacles are placed, each player places 2 objective tokens within range 2 of their player board edge and beyond range 3 of another objective token.

**End Phase:** Ships within range 1 of an opponent's objective token remove the objective token unless there is an enemy ship within range 1 of that token.

**Scoring:** After calculating scores, each player gains 30 points for each objective token claimed.

#### VIP SCENARIO

**Objectives:** 3 Pairs of Objective Tokens and matching Objective Cards

**Setup:** 3 Pairs of Objective Tokens and Obective Cards.

After placing forces, each player assigns each of their 3 objective cards (  $\mathscr{E}$ ,  $\mathscr{Q}$ ),  $\mathscr{A}$ ) face-down to one or more of their ships. Assign the associated objective tokens face-down to those ships as a reminder.

The Lightsaber (  $\mathscr{S}$  ) token must be assigned, its carrier may not be placed in reserves.

After a ship with an objective token is damaged, reveal its objective card. If the \$\mathscr{L}\$ objective card is revealed, place 2 evade tokens on it. While the ship with the \$\mathscr{L}\$ objective card attacks or defends, it may remove up to two evade tokens from that card to gain that many matching tokens.

**Scoring:** If the ship equipped with the \( \textit{\textit{m}} \) objective card is destroyed, the opposing player gains 50 points.

# CONJOINED ENVIRONMENT

Objectives: 8 Obstacles

**Setup:** After a player places an obstacle, they must place a second obstacle touching that obstacle.

#### NEBULA Environment

Objectives: 8 Obstacles5 Gas Clouds, 3 Non-Asteroid Obstacles

**Setup:** After the second obstacle is placed, any additional obstacles must be placed within range 1-2 of another obstacle and beyond range 3 of the player board edges.

Obstacles may be placed at range 2 of the neutral board edges.

# OLD WRECKAGE ENVIRONMENT

Objectives: 3 Asteroids, 5 Debris Clouds

Setup: Asteroids must be placed first.

All asteroids after the first one must be placed within range 1-2 of other Asteroids.

Debris Clouds must be placed touching an Asteroid and may be placed at range 1 of other Debris Clouds. They may be placed at range 2 of the neutral board edges.

# PLANETARY RING

Objectives: 8 Obstacles

**Setup:** Obstacles must be placed beyond range 3 of the player board edges and range 0 of the neutral board edges.
